

Welcome to Year 3!

We are so pleased to welcome you all back into school. We are really excited to start our amazing learning journey with you and can't wait to see how you all grow and develop over the year.

Additional Information

You can contact us by emailing: year3@westfield.staffs.sch.uk. We check these emails at the end of each day.

PE days: Both classes have PE on Monday and Friday

English

During this half terms English, our classes will be looking at lots of exciting texts.

Pupils will read Aesop's Fables and have the chance to write their own animal inspired fable.

Research information about a predator and choose how to present it to create our own fact-file.

We are then going to be using our skills to write and perform a villainous speech that includes the 5 Ps: pace, pitch, power, pause and punctuation.

After that, each class will be looking at animal poetry to create a poem with structure.

Maths

In our maths lessons we are now ready for the challenge of exploring and understanding place value.

Pupils will use practical equipment to make models of the numbers to show the value of each digit.

In class children will be comparing and ordering numbers using $<$, $>$ and $=$ symbols.

We will be adding and subtracting using formal written methods.

Reading at home - Accelerated Reader

In Year 3, children begin to use the Accelerated Reader Programme and they are encouraged to read their chosen book throughout the week. The children will then complete a quiz on their chosen book to assess their understanding.

Times tables

Children will now be able to practise their timetables through Times Table Rock Stars. This can be accessed at home using the login details given to the children.

Spelling

Please practise the common spelling words from National Curriculum that will be sent home during the second week of the autumn term.

Year 3 staff

Miss L Jones , Mrs Beasley, Mr Dando, Mrs Beal and Mrs S Jones

Creative

Look out for a life size skeleton which will be visiting our classrooms to help us learn about the bones in the human body. Each class will work as a team to learn the names of the bones and how they fit together to construct a skeleton of our own. The children will investigate the skeletons of other animals to find out how they are similar to a human skeleton and to identify any differences. Models will be built to show how muscles work to move the bones in our bodies.

We will also have a special visit from Hagley Falconry Centre who will show us their birds of prey.

Furthermore pupils will find out about the diets of different animals and what humans need to eat to keep us healthy. In our DT project children will select, measure, prepare and cook ingredients to make a healthy vegetable soup.

Finally an investigation will take place to show how water is transported through a plant, what seeds need to grow well and whether a plant can be a predator.

Religious Education

We are going to be exploring Christian and Islamic rules for living.

PSHE

This half term, children will be focusing on 'Me and My School'.

Physical Activity

We will develop skills to pass and receive a ball with accuracy.

Homework

Try your best to complete at least 2 pieces of homework this half term. Remember to bring your homework in to school so that we can celebrate your hard work in class.

Create the ultimate predator. Label the parts and give it a name.

Design and make a healthy sandwich. Remember to take a picture.

Make a tally chart to show the plants that are growing in your garden, local park or wooded area.

Choose any vertebrate animal and draw it's skeleton.

Plan a healthy lunch box. Draw and label each item to show which food group it belongs to.

Can you challenge yourself to make a working muscle?

Label a photograph of yourself identifying different parts of your body, skeleton and muscles.
